Section 1. Sprint Goal

During this sprint, my goal is to achieve a visualisation of the data, fixing some errors and making the code pretty, work will be done to make a docker, and easier navigation since the GUI can always be changed and improved.

Section 2. Commitment

From 20/02 / To 06/03

Back log ID	As a <type of user>	Userstory	so that <achieve some goal>	Acceptance criteria
5	Analyst	I want to navigate the software easily	So I can use it without terminal knowledge	Navigation without terminal knowledge, simplified and beautiful to my standards
1	Analyst	I need to Visualise data	So I can get a different viewpoint.	A way to store and see graphs relevant to the data, in PDF format
6	Analyst	I want to be able to easily setup the software	So I don't have to struggle if I'm not technical	A single terminal line or a download to get the executable working
7	Analyst	I want to see all code reviews from a date	So I don't only see 500	The JSON file to return 500/2000 codechanges
8	Analyst	I want to to see errors from server	So I know if its a server problem and not my filters	Most common HTTP errors returned when it occurs
